

We are looking for a **Full Stack Developer** to develop and maintain our digital solutions. You'll be part of a cross-functional team that's responsible for the full software development life cycle, from conception to deployment.

As a Full Stack Developer, you should be comfortable around both front-end and back-end JavaScript coding languages, development frameworks and third-party libraries. You should also be a team player with a knack for visual design and utility.

If you're also familiar with Agile methodologies, we'd like to meet you.

Major Responsibilities

- 1. Strong experience with Express.js, React/Angular, Node.js, MySQL
- 2. Plan, build, and deliver end-to-end product features.
- 3. Create highly usable and scalable database designs and APIs.
- 4. Build interactive, responsive & performant front-end interfaces.
- 5. Actively participate in design and code reviews.
- 6. Work with development teams and product managers to ideate business friendly software solutions
- 7. Taking part in Demos, Sprint Planning, Retrospectives etc. with the rest of the team
- 8. Implementing functionality through RESTful APIs
- 9. Develop and manage well-functioning databases and applications
- 10. API development, testing and deployment
- 11. Test software to ensure responsiveness and efficiency
- 12. Troubleshoot, debug and upgrade software
- 13. Build features and applications with a mobile responsive design
- 14. Write technical documentation
- 15. Ensure product passes all stages before deployment to production
- 16. Manage and regulate security compliances as per industry standards

Requirements

- 1. Proven experience between 4 7 years as a Full Stack Developer or similar role
- 2. Experience developing web and mobile applications
- 3. Previous experience in insurance domain would be an added advantage
- 4. Full stack development experience in Node.js and Angular/React
- 5. Familiarity with databases (e.g. MySQL, SQL server), web servers (e.g. Apache) and UI/UX design
- 6. Excellent communication and teamwork skills
- 7. Degree in Computer Science or relevant field
- 8. Experience with containers
- 9. Experience with CI/CD
- 10. Elementary knowledge of AWS Cloud
